the best cashmere and silk

brown Sugar. Milano guarantee and provide to our custumers the highest quality from the best textile cashmere and silk selection from Carriaggi supplier.

Each product is a creation of a solid 1000 gr pure cashmere enriched with tightest and softness textile knitting handcrafted work creating a wonderful experience of wearable comfort and climate adaptation.

Our Cashmere is a fine natural fiber obtained by the coat of the Capra Hircus Laniger, which lives in a habitat where there are significant changes in temperature between the day and night time, leading to the development of a finer, more prized undercoat known as down. This noble fiber comes from several areas in China and Mongolia.

After the selection of the best quality, it is then processed in Italy using leading-edge technology to become a precious yarn collection. The extraordinary properties of lightness, softness, and temperature adjustment - with a natural insulating (power of up to 10 higher than wool) make this yarn perfect for any season.

The silk used by brown Sugar Milano is a selection of Mulberry silk grown in specific areas of China.

The value and uniqueness of this silk are the results of the meticulous choosing the fibers with the best technical characteristics in terms of regularity, shine, and cleanliness so that they can be combined with the most prestigious cashmere to make exclusive yarns in unique colors.
